May 24th, 2020 - Of course the parallels between medicine and religion have always been obvious to anyone who has eyes to see the patient consultation as confessional. The use of long Latin words that the patient cannot understand. The rituals and incantations of medicine have clear parallels with religion. Or would that be the other way round? You could go on...
'the conflict between science and religion as an invented
June 2nd, 2020 - not only between some science and some religion but also between some science and some ethics politics or even among different sciences but the thesis of a global conflict between all science and all religion can be seen as a product of nineteenth century rhetoric to consolidate the not obvious role of scientist in modern society'

I am sincerely happy that the religion which chance has given you has contributed to your peace of mind and often as Western medical science now reluctantly admits to your physical well being.

Science and religion are thus like two circles which intersect or partially overlap. It is in the area of intersection that the dialogue takes place and during the last quarter century a flourishing dialogue between science and theology has been going on in North America and Europe.

May 20th, 2020 - because religion spirituality is a powerful source of meaning for so many patients and practitioners perhaps it is time not just for a truce between religion and medicine but for a rapprochement if cutting edge medical science can see religious meaning as producing measurable biochemical effects then perhaps the holy and the healing can be'
March 27th, 2020 - This is an issue that has been inadequately explored. The aim of this study was to explore the relationship between religion, including religious affiliation, religious activities, and religious beliefs, and attitude toward spiritual care in clinical nurses. The study used a cross-sectional correlation study design. Six hundred nineteen nurses were included as participants.

May 20th, 2020 - There is a growing interest in studies that document the relationship between science and medicine as ideas and practices.

June 3rd, 2020 - That's true in the home medicine cabinet, the doctor's office, and the hospital. NASA's role in medical breakthroughs is no accident. When Congress established NASA in 1958, it required the space agency to share information about its discoveries. NASA was also given the go-ahead to patent inventions and help businesses develop commercial uses.
